LVLE Leverage Leg Extension

Body-Solid's LVLS Leverage Leg Extension boasts a solid 2" x 3" 11-gauge steel mainframe, with an electrostatically applied metallic silver powder coat paint finish. The foot roller is adjustable to accommodate different leg lengths and start position. The LVLS Leverage Leg Extension features a direct link movement arm design that enhances smooth and continuous range of motion for advanced biomechanics. Among it's other features are gas assist back pad adjustment, sealed bearing pivot points, and durable double-stitched upholstery.

Weight: 157 lbs.
Dimensions: 68"L x 47"W x 40"H

Special Features

- Direct link movement arm design enhances smooth and continuous range of motion
